## WORK EXPERIENCE

### Programmer
Excavate Research and Analysis

*02/2021 - Present*

*Achievements/Tasks*

- Worked on building a survey builder application using **React Js** whose aim is to reduce the company expenses by huge difference.
- Programmed various surveys with complex logics for market research as per client's request.
- Used Javascript, Perl, HTML and CSS to deliver custom surveys that include some complex validations to be handled based on the input.
- Over a period of last 6 months, delivered 15+ projects with 100% client satisfaction.
- Simultaneously assisted multiple clients, worked under pressure and managed to complete work within strict deadlines.
- Created tools for internal use which increases efficiency of day to day work.

### Cognitive Research and Analytics Intern
RoundTrip

*07/2020 - 08/2020*

*Achievements/Tasks*

- Worked on a research project whose aim is to provide security to Cab Passengers.
- My task was to search for solutions by which thermal cameras and artificial intelligence together can be used to track suspicious activities inside a cab.
- Tasks include - everyday meeting with mentors, reading and understanding multiple research papers.

## EDUCATION

### Bachelor of Technology in Computer Science
IITM,Murthal

*06/2017 - 06/2021*

### Class 12th
MAPS, Ashok Vihar

*03/2016 - 03/2017*

### Class 10th
MAPS, Ashok Vihar

*03/2014 - 03/2015*

## SKILLS

React   JavaScript   MySQL   NodeJS   HTML   CSS   MERN   MEAN   MS Word   MS Excel   MS PowerPoint

## PERSONAL PROJECTS

### Survey Builder
- Developed a survey builder app using **React JS** as frontend and SQL as storage database
- Used React to display questions to the respondent.
- It has separate admin access to all the surveys being created using the app (from all users).
- Added advantages for users by giving ability to copy-paste while building response-list
- Separate panel to check the contents of the survey like - total questions, total variables, etc.

### Realtime Chat App - MERN ⬈
- Developed a realtime chat app that uses React as frontend and MongoDb as storage database.
- Works in realtime to establish a chat environment between users.
- For realtime value updates, Pusher is used.
- Deployed frontend on Netlify and backend on Heroku.

### Myntra Cart App ⬈
- Developed a clone of official Myntra cart.
- Promotional Offer can be applied to avail discount on the total bag price.
- Calculates the total cost based on the total units, their price, discounts and shipping charges.
